SABRE - Cutting Edge Genomics for Sustainable Animal Breeding

The EU-funded project SABRE (Cutting Edge Genomics for Sustainable Animal Breeding, www.sabre-eu.eu) would like to inform you of a new call for training funds which is now open to allow short-term movement of scientists into the project, and within the project.

There are funds available for scientists from new EU Member States and INCO to spend time working in a SABRE partner's organisation:

i) Four short-term placements for scientists from new EU Member states.
ii) Four short-term inward placements for scientists from INCO countries. Preference will be given to applications from female scientists.

There are also funds available to scientists from organisations who are partners in the SABRE project:

i) SABRE 'Integrating' Awards - Ten integrating awards for scientists involved in SABRE to carry out activities which help promote integration within the SABRE project. Such activities may include short-term placements at another SABRE partner, a series of short visits to another SABRE partner, a small working group meeting to tackle a specific problem or a small workshop.
ii) Early Stage Researcher (ESR) Short-term Placements - Two short-term placements for Early Stage Researchers (ESRs) involved in SABRE to spend time working with another partner within the SABRE project.

Please see www.sabre-eu.eu/GetInvolved/Training for full details of all the calls and information on how to apply. If you have any questions, please get in touch with me by emailing: training@sabre-eu.eu

Kind regards,

Carol Telford
Genesis Faraday and SABRE Training Work Package Leader
